

Folding Cartons

Corrugated Boxes & Displays

Product Description

Folding Cartons are available in paperboard weights of 12 pt. and above and can be printed with up to six colors with in-line coating capabilities. Our standard paperboard is made from 100% recycled paper – 95% of which is post-consumer recycled. SBS board stock is also available for those packaging projects that require it. We can assist with all aspects of the package development including graphic design, structural design, dielines for artwork placement, and prototype samples. Folding cartons are ideal for software packaging, electronic components and retail products.

Stock or Custom Solutions

Plain white folding cartons are available in a variety of stock sizes and styles (see back). For custom solutions, our 64" sheet fed presses, precision diecutting, folding and gluing equipment enable us to produce a wide range of custom sizes and styles.

Corrugated Boxes – We offer a full range of litho-laminated or direct print corrugated boxes in a variety of flutes.

Point of Sale Displays – We are also able to design and produce P.O.S. displays and trays.
