

Jumbojacket

Ultra-Thick Bubble Mailers

Product Description

Jumbojackets are ultra-thick, light-weight protective bubble mailers made from a durable, moisture resistant, multi-layer blend of co-extruded polyethylene film. The exterior film is laminated to an extra high profile 1/2" resilient interior bubble material for superior cushioning protection and is constructed with a bottom fold and strong side heat seals for superior bursting strength. The bright white exterior film creates the professional image you are looking for and our pressure sensitive self-seal adhesive closure system is reliable, tamper-evident and easy to use. Ideal for fragile items such as hardcover books, tablet PCs, cell phones and other electronic components.

PACzip is available on the Jumbojacket. This allows the mailer to be opened more easily by the recipient but does not compromise the integrity of the mailer or the security of the contents in transit.

Custom Solutions

Be Different... Brand your Deliveries! Increase your brand awareness by customizing your package with our six color printing capabilities enabling us to print even the most complex designs.

Closure System

Pressure sensitive (self-seal) adhesive closure is reliable and tamper-evident. **Anti-stat** release liner peels off quickly. Easy to load contents and seal package when the packing process needs to be fast and efficient.

Opening System

PACzip tear strip provides quick and easy opening. Saves time in product retrieval, does not compromise the security of the contents in transit or the integrity of the mailer like a traditional perforation.

Material

Multi-layer (co-extruded) polyethylene exterior film laminated to an extra high profile 1/2" interior bubble material. Durable, moisture resistant with exceptional puncture resistance and tear strength. Clean white, aesthetic appearance. Effective protection for more fragile products. Enhances your corporate image and customer perception of your product(s).

Construction

Side pouch heat seal and bottom fold construction offers superior bursting strength. Your contents will remain secure from the point of origin to its destination.

Cross Section View

1/2" bubble height.
