PAC Worldwide's  
Clean Green Solutions

## Inspired by Nature

PAC Worldwide is excited to announce our renewed commitment to offset 50% of the energy we use with Renewable Energy Credits (RECs).

Purchasing these credits ensures that 50% of the energy we use is offset with **Green-e® Certified American Wind Energy**.

### Reducing Our Impact

We recognize that every business has an environmental impact and we are working on reducing ours. By purchasing 3,562,876 kilowatt hours of renewable energy credits annually, PAC Worldwide helps to avoid 3,986,259 pounds of carbon dioxide pollution, the major contributing cause of global climate change.

This commitment is equivalent to one of the following:

 Removing 331 cars from the road for one year.

 Avoiding conventional electricity use in 251 households.

 Carbon sequestered annually by 411 acres of pine or fir forests.

 CO2 emissions of 4,205 barrels of oil.

### Our Green Products

We've also committed to provide you with the greenest products we can offer. All of our poly products are 100% recyclable. We also offer:

## Biodegradable by PAC

By utilizing a revolutionary additive technology, these Poly Bubble Mailers, Flat Poly Mailers and BubbleRoll are fully biodegradable, compostable and recyclable, while still maintaining their desired characteristics that have made them a leader in the protective packaging market.
