Increase Fulfillment Speed,
Decrease Labor CostsTHE GREEN
MACHINE

Click the image below to see the environmental benefits of the PACJacket packaging film vs. Kraft Bubble Mailers.

Time is MONEY

We've all been forced to tighten our belts during this economic down turn. Running an efficient, cost conscious business is almost critical to survive.

REMEMBER: TIME IS MONEY!

When it comes to cost, TIME is a primary factor of order fulfillment. Think about the time it takes for one order to be packaged and sent out. If you could increase fulfillment speed AND cut down on labor costs, you could save a significant amount of money!

INCREASE FULFILLMENT SPEED

On an average the PACJacket machine produces 12-20 bags per minute using protective bubble film.* By comparison, a person hand-loading and sealing kraft bubble mailers puts out an average of 3 bags per minute.* Increasing fulfillment efficiency by 400 to 500%!

GET MORE FOR YOUR MONEY

1 truckload of PACjacket film (301,600 bags) is equivalent to 4.8 truckloads of kraft bubble mailers. As you can see, by going with the PACjacket system you'll save money on freight while decreasing your carbon footprint.

SOLUTION: The PACJacket Automated Packaging Machine
