ANNOUNCING

100% BIODEGRADABLE MAILERS

BY PAC WORLDWIDE!

BIODEGRADABLE by PAC Worldwide!

PAC Worldwide announces their full line of 100% Biodegradable, Compostable and Recyclable Poly Bubble Mailers, Flat Poly Mailers and Bubble Roll!

By utilizing a revolutionary additive technology, the above mentioned products can be fully biodegradable while still maintaining their desired characteristics that have made them a leader in the protective packaging market!

Where will these products biodegrade?

- Home composting
- Commercial composting
- Landfills
- Buried in or in contact with soil

Where won't they degrade?

- Warehouses
- Store shelves
- Everyday use

These products:

- Fully biodegrade in 9 months to 5 years wherever they are disposed of where other things are biodegrading (anaerobically and aerobically)
- 100% recyclable
- 100% compostable
- Do not use heat, light or mechanical stress to break them down
- Do not require special handling (unlike PLA and oxodegradable)
- Good for the environment, no heavy metals
- Return to the environment not as small particles, but as biomass and humus

For more information please visit www.pac.com or contact PAC Worldwide directly at 1-800-535-0039
