Ahead of the Curve

Ahead of the Curve

PAC Worldwide is always coming up with new and improved products to offer you, and what better way to communicate these offerings than by our pac.com website!

PAC Worldwide is taking a step further when communicating it's new **Biodegradable by PAC** product line. By using interactive 3D animation, PAC is doing more than just "telling" their story, they are **SHOWING** you in a fun and exciting way!

The PAC Worldwide Kraft Airjacket has been re-engineered with a stronger bubble and higher cooling efficiencies. Protecting the products you ship while cutting down on your shipping costs and saving you space in the warehouse.

Speaking of IMPROVED products, on August 1st, 2009, PAC launched it's new and improved Kraft/bubble mailer line! Not only is this product up to 36% stronger than our current offering, but its new design will provide up to 43% higher cubing ratios. Simply put, that means fewer trucks, and less warehouse space. Most importantly however in these challenging times, you will receive these additional benefits at no additional cost. Click image above for direct comparison of PAC's KraftAirjacket vs. other Kraft Bubble Mailers.
