

Wicketed Poly Mailers

Wicketed Polyjackets can increase your throughput speeds up to 20% by freeing up one hand for packers to easily insert products into these stationary mailers. These ultra-tough, light-weight, and protective flat poly mailers can be vertically mounted on a workstation, or even placed on wicket stands, creating valuable space for your packer to operate without clutter.

These mailers are made from a durable, moisture resistant, multi-layer blend of co-extruded polyethylene film which is made of up to 35% recycled content. They are constructed with strong, heat sealed sides for superior bursting strength. The pressure sensitive, self-seal adhesive closure system is reliable, tamper-evident, and easy to use. Wicketed bags are ideal for less fragile shipments such as clothing, soft goods, parts, soft toys, and shoes.

Closure System

The pressure sensitive (self-seal) adhesive closure is reliable and tamper-evident. The **Anti-stat** release liner peels off quickly, making it easy to load contents and seal package when the packing process needs to be fast and efficient.

Optional Flap

Additional flap allows customers to reseal and reuse the mailer for truly hassle free returns. This is ideal for any e-commerce merchant that wants to enhance the customer experience and add value. Reusable packaging reduces waste and is more environmentally friendly.

Material

The durable, moisture-resistant, multi-layer (co-extruded) polyethylene film is made of up to 35% recycled content. Its durable nature will provide effective protection, while the clean, white aesthetic enhances your corporate image and customer perception of your product(s).

Construction

The sideweld heat seals and bottom fold construction provides superior bursting strength, so your contents will remain secure from the point of origin to the destination.

Optional Features

- Bottom gusset

The Polyjacket is 100% recyclable.

LDPE

Stock Products Program
