

Wicketed Polyjackets can increase your throughput speeds up to 20% by freeing up one hand for packers to easily insert products into these stationery mailers. These ultra-tough, light-weight, and protective flat poly mailers can be vertically mounted on a workstation, or even placed on wicket stands, thus freeing up valuable space for your packer to operate without clutter.

These unique bags are made from a durable, moisture resistant, multi-layer blend of co-extruded polyethylene film. They are constructed with strong, heat sealed sides for superior bursting strength. The pressure sensitive, self-seal adhesive closure system is reliable, tamper-evident, and easy to use. Wicketed Bags are ideal for less fragile shipments such as clothing, soft goods, documents, parts, soft toys, pharmaceuticals and shoes.
