**PAC Worldwide Introduces the Xpandojacket™, an Ingenious  
Expandable Bottom Gusset Bubble Mailer**

**REDMOND, WA — May 23rd, 2011 —** PAC Worldwide Corp. is excited to announce another industry changing innovation in the world of bubble mailers, with the release of the Xpandojacket™.

Sometimes the average bubble mailer just isn't good enough to hold bulkier products, and your only other resort is to use a more expensive, corrugated box with void fill. The Xpandojacket is an expandable bottom gusset bubble mailer with a bright white, water resistant triple layered polyethylene exterior. This innovative mailer by PAC Worldwide expands to fit items that need more room such as toys, shoes, handbags, and electronic components.

“We are proud to continue to bring innovative solutions, like Xpandojacket, to our customers, which in turn enables them to trim costs and stay ahead of their competition.”—Steve Foster, Vice-President, Sales.

**About PAC Worldwide Corporation**

PAC Worldwide, an industry leader and manufacturer of protective flexible packaging, has built their business up since 1975 based on outstanding service and quality products. This
