

Ultra-Thick Bubble Mailers

Jumbojackets are ultra-thick, lightweight, protective bubble mailers made from a durable, moisture resistant, multi-layer blend of co-extruded polyethylene film. The exterior film is laminated to an extra high profile 1/2" resilient interior bubble material for superior cushioning protection and is constructed with a bottom fold and strong side heat seals for superior bursting strength. The bright white exterior film creates the professional image you are looking for and our pressure sensitive self-seal adhesive closure system is reliable, tamper-evident and easy to use. Ideal for shipping fragile items such as hardcover books, tablet PCs, cell phones and cosmetics. Optional dual peel and seal flaps provide e-commerce companies with the perfect solution for customer returns.

PACzip is available on the Jumbojacket. This allows the mailer to be opened more easily by the recipient without compromising the integrity of the mailer or the security of the contents in transit.

Stock or Custom Solutions

Plain white Jumbojackets are available in several sizes through our convenient Stock Products Program. *Be Different... Brand your Deliveries!* Increase your brand awareness by customizing your package with our six color printing capabilities that enable us to print even the most complex designs. .

Ultra-Thick Bubble Mailers

Closure System

The pressure sensitive (self-seal) adhesive closure is reliable and tamper-evident. The **Anti-stat** release liner peels off quickly, making it easy to load contents and seal package when the packing process needs to be fast and efficient.

Opening System

Unlike a traditional perforation, the **PACzip** tear strip opens quickly and easily and does not compromise the security and integrity of the mailer or its contents.

Material

Multi-layer (co-extruded) polyethylene exterior film laminated to an extra high profile 1/2" interior bubble material is durable and moisture resistant with exceptional puncture resistance and tear strength, providing effective protection for fragile products. The clean, white aesthetic enhances your corporate image and customer perception of your product(s).

Construction

The side pouch heat seals and bottom fold construction provides superior bursting strength. Your contents will remain secure from the point of origin to the destination.

The Jumbojacket is 100% recyclable.
