

AUTOMATED MAILER SYSTEM

PAC's **Eco PACjacket®** automated packaging solution auto-seals your product in a high-quality paper padded or flat **curbside recyclable** mailer.

Our single web design produces a high-quality seal that offers greater security for its contents by reducing the number of heat seals necessary to create a finished package. The Eco PACjacket machine is a must-have automated system for high-volume e-commerce applications.

Perfect shipping solution for a variety of products such as:

cosmetics

books

jewelry

shoes

toys

pharma

clothing

electronics

The Eco PACjacket system automatically seals your product in a lightweight, ultra-protective, durable paper package made from curbside recyclable, natural kraft paper.

ENVIRONMENTALLY FRIENDLY

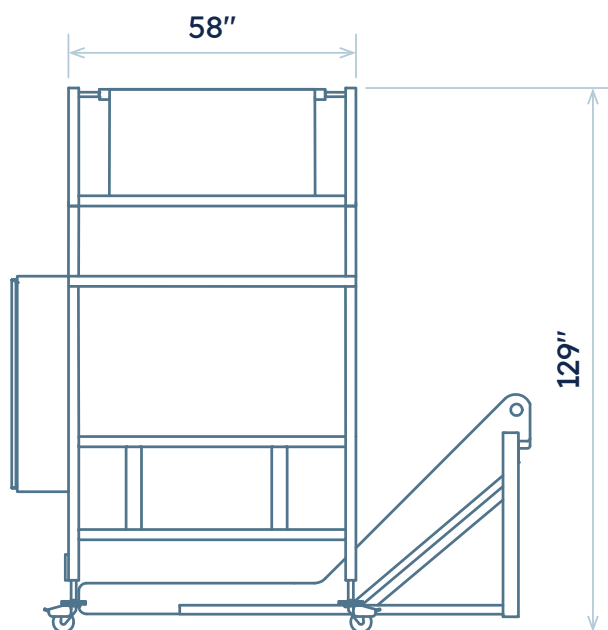

- Eco PACjacket mailers are curbside recyclable.
- Curbside recyclable packaging reduces waste from entering the landfill.
- Decrease your packaging waste by right-sizing and lightweighting. Less fragile items don't require bulky corrugated boxes and void fill.
- Visit pac.com/recycle to learn more.

SPECIFICATIONS

- 208VAC Split Phase
- 60A Service
- 100 psi clean dry air
- Custom printing available in random repeat or registered print

FEATURES & BENEFITS:

- Allen Bradley processor with 7" colored high-resolution touch screen operator interface panel which allows for better graphics and more information per page.
- Single web system with center folder eliminates the need for adjustment/alignment of two webs of material.
- Auto labeler with fully integrated mounting system with easy front access for roll change or service work.
- Dual ultrasonic sensors sense the size of your product and will cut the package to the appropriate length.
- Precise, servo-driven web feeding.
- Self-centering guides keep rolls aligned and centered correctly while moving through the system.
- Linear actuator allows for precise material tracking.
- No heavy lifting with the pneumatic roll lift.
- End of roll sensor.
- Save space with a smaller, more compact floor footprint.

For almost 50 years we've been solving problems, building reputations and Protecting the Things People Care About®.
